DETAILED ACTION

1. It is hereby acknowledged that the following papers have been received and placed of record in the file: Amendment dated January 3, 2005.
2. Claims 1-11 are presented for examination.

Claim Objections

3. Claim 1 is objected to because of the following informalities: “the first *red* flag” should be “the first flag” as there is no associated antecedent established with respect to “first red flag”. Appropriate correction is required.

Examiner’s Amendment

4. An examiner’s amendment of record appears below. Should changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
5. The application has been amended as follows:
6. Pursuant to MPEP 606.01, the title has been changed to read:
7. -- METHOD AND PROCESSOR FOR INITIALIZING A PLURALITY OF NON-OVERLAPPING AREAS WITH ASSOCIATED FLAGS AND SIGNALS --

Allowable Subject Matter

8. Claims 1-11 are allowed.
9. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Art Unit: 2116

10. The following is an examiner's statement of reasons for allowance: the claims are allowable because none of the references cited, either alone or in combination discloses or renders obvious "a processor comprising: a first initial setting area which is initialized based on an input of a first reset signal; a second initial setting area which is initialized based on an input of either the first reset signal or a second reset signal and which do not overlap with said first initial setting area; a first flag that is cleared by an input of the first reset signal and that is set when initial setting of the first initial setting area has been completed; and a second flag that is cleared by an input of either the first or second reset signals and that is set when initial setting of the second initial setting area has been completed, wherein when the first reset signal is input, the first input setting area is initialized after confirmation that the first flag is cleared and the second initial setting area is initialized after confirmation that the first flag is set and the second flag is cleared, and when the second reset signal is input, the second initial setting area is initialized after confirmation that the first flag is set and the second flag is cleared without clearing the first flag".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
